

CONFERENCES

9th International & 27th National Conference of ARTTI Science behind delivering patient care with Precise Techniques and Mastering Motion Management

14-15 October 2023
Mumbai, India

Endorsed by ESTRO

We are delighted to invite you, on behalf of **Kokilaben Dhirubhai Ambani Hospital & Medical Research Institute (KDAH), Mumbai**, and **the Association of Radiation Therapy Technologists of India (ARTTI)**, to attend the 9th international & 27th national conference of ARTTI (ARTTICON 2023).

The conference promises a busy scientific schedule.

While in Mumbai, you may also enjoy the economic capital of India, the so-called "City of Dreams"; October is pleasant in the city, with clear weather and temperatures of 25-32°C.

The **ARTTI** was formed in 1996 to provide a platform for all radiation therapy professionals in India. The main aim was to develop academic activities for radiation therapists and to enable them to update themselves on the latest technological developments in radiation oncology. The ARTTI has grown, learned and earned recognition and honours from the radiation oncology fraternity through its continuous academic engagement, appraisal and development of radiation therapists in India. It has allied with radiation therapists worldwide to participate internationally in academic activities and has collaborated with ESTRO to share experience across the area of radiation oncology.

We are confident that the conference's scientific programme, alongside the fantastic cuisine and the combination of heritage and modernity will make your visit to Mumbai a memorable experience.

To register for the conference please visit: www.artticon2023.com

Thank you.

Sumit Basu

Organising chairman, ARTTICON 2023, and

Debojyoti Dhar

Organising secretary
