

# CONFERENCES

## Virtual Grand Rounds in Radiation Oncology

*The latest practice-changing research findings in radiation oncology are presented and discussed online! We proudly present the new series, starting on 6 September 2023, 5 pm CEST*

The virtual grand rounds in radiation oncology are organised by Professor Matthias Guckenberger of the University Hospital Zurich, to foster exchange and to enable viewers to learn from leaders in the fields of radiation oncology and oncology in general.

Internationally renowned speakers will present their latest, practice-changing research findings and will be available for discussion and to answer questions. The virtual format of 30 minutes every first Wednesday of each month should enable the integration of these talks into everyone's busy agenda, helping those who join to stay at the forefront of current knowledge.

We look forward to meeting you at our virtual grand round events. Join us to learn more and participate in the discussions.

More information about speakers, the Zoom link and more can be found here: [Virtual Grand Rounds in Radiation Oncology – USZ](#)

With kind regards,

**Matthias Guckenberger**
