## A few stimulating physics contributions at ESTRO 2020

Dear Readers,

As editors of the physics corner, during our attendance at the 2020 meeting of the European Society for Radiotherapy and Oncology (ESTRO), we picked a few (seven) stimulating physics contributions. We present them in a Q&A with the authors of these studies.

We hope you find the selection as stimulating as we did. Happy reading! Click on this link [>>>](#)
