

**17th PSI Winter School
for Proton Therapy**
14.01. – 19.01.2024
Villigen PSI, Switzerland

Endorsed by¹
ESTRO

**Everything you always wanted to know about
the why and how in radiating cancer with
protons**

The PSI Winter School for Proton Therapy is a four day course given by experts of the Center for Proton Therapy in Switzerland and their colleagues worldwide. It provides detailed knowledge on the clinical, physics and technological aspects of proton therapy using pencil beam scanning.

To find out more, visit:

[https://indico.psi.ch/
event/14947/](https://indico.psi.ch/event/14947/)

This course is of interest for radiation oncologists, medical physicists, physicists, engineers, radiation therapists and dosimetrists. No previous knowledge of proton therapy is necessary.

The Winter School will be credited with European CME credits (ECMEC[®]s).

Organizing Chairs:
Prof. Dr. med. Damien C. Weber
Prof. Dr. Tony Lomax
